Name of Lessee(s): _____

7. **Have the above surface and mineral owners been notified in writing?**

☒ Yes ☐ No

If no, why not? Permit process is in infancy, I must get Reclamation Bond before sending Notification to BLM

*Please be advised that if State Trust Lands are involved, notification to the Division of Oil, Gas and Mining alone does not satisfy the notification requirements of Mineral Leases upon State Trust Lands. Exploration or mining activity on State Trust Lands requires a minimum of 60 days notice to the Trust Lands Administration **prior** to commencing any activities. Please contact the School Institutional Trust Lands Administration (SITLA) at (801) 538-5508 for notification requirements.*

8. **Does the Entity have legal right to enter and conduct mining operations on the land covered by this notice?** ☒ Yes ☐ No

II. **PROJECT LOCATION & MAP** (Rule R647-3-105)

1. **Project Location** (legal description):

County(ies): Emery

UTM East 5L 88M (if known) UTM North _____ (If known)

Name of Quad Map for Location: Jessies Twist

2. **Location and Operations maps** must be plotted at a scale to accurately identify locational landmarks and operations details. All maps must include a north arrow, scale, appropriate labels, and title box including the mine name, township, range and section.

a. The **general location map** must be the scale of a USGS 7.5 minute series map or equivalent (1"=2000') and identify new or existing access roads.

b. The **operations map** (1"=200' or other scale as determined necessary by the Division) must be labeled and identify:

i. The area to be disturbed;

ii. The location of any existing or proposed operations including access roads, drill holes, trenches, pits, shafts, cuts, or other planned activities; and

iii. Any adjacent previous disturbance for which the operator is not responsible.

(Contact the Division for a list of consultants and land surveyors for mapping assistance.)

3. The proposed (5 acre or less) disturbed area (including access/haul roads) should be marked in the field ON THE GROUND with metal T-Posts (or with some other marker of equal effectiveness). Markers should be appropriately spaced so that the next marker in either direction is clearly visible with the naked eye.

III. **OPERATION PLAN** (Rule R647-3-106)

1. Type of mining: Surface ☐ Underground ☒

2. Mineral(s) to be mined: URANIUM

3. Amount of material to be extracted, moved, or proposed to be moved: estimate
ORE 40,000 TONS WASTE 120,000 TONS

4. Will any water, liquid chemicals, reagents, or other solutions be used, produced or discharged as part of the mining or milling process?

Yes ☒ No ☐ If yes, please describe (add extra pages if needed)
Water for air drill machines will be used. Nothing
will be discharged

5. Provide a brief description of the proposed mining operation and onsite processing facilities (add extra pages if necessary). Underground mining drill and blast.
Ore will be moved to surface then shipped to White Mesa Mill.
Some waste will be placed on surface, some waste will
be back filled underground.

6. ■ **New Road(s):** Length NONE (ft) Width _____ (ft)

7. ■ **Improved Road(s):** Provide a description of the improvements that need to be made to existing roads to access the site, including the Length NONE (ft) and Width _____ (ft) of improvements.

8. Total project surface acreage to be disturbed: 5 (acres) PLEASE SPECIFY
EXACT ACREAGE - (this will be used to determine surety bond amount – see #VI).

9. Proposed startup date (month, year) JUNE - 2008

10. Proposed completion date, if known (month, year) UNKNOWN

IV. OPERATION AND RECLAMATION PRACTICES (Rule R647-3-107, 108 & 109)

The reclamation and operation obligation is to keep the area clean and safe, minimize hazards to public safety, return the land to a useful condition, and reestablish at least 70 percent of the premining vegetative ground cover. To accomplish this, the Permittee / Operator will need to perform reclamation concurrently, or at the completion (within one (1) year) of mining. Please refer to The Practical Guide to Reclamation in Utah, available at www.ogm.utah.gov.

1. *Keep the mining operation in a safe, clean, and environmentally stable condition.*
2. *Permanently seal all shafts and tunnels to prevent unauthorized or accidental entry.*
3. *Plug drill holes with a five foot cement surface plug. Holes that encounter fluids are to be plugged in the subsurface to prevent aquifer contamination.*
4. *Construct berms, fences, or barriers, when needed, above highwalls and excavations.*
5. *Remove, isolate, or neutralize all toxic materials in a manner compatible with federal and state regulations.*
6. *Remove all waste or debris from stream channels.*
7. *Dispose of any trash, scrap metal, wood, machinery, and buildings.*
8. *Conduct mining activities so as to minimize erosion and control sediment.*
9. *Reclaim all roads that are not part of a permanent transportation system.*
10. *Stockpile topsoil and suitable overburden prior to mining.*
11. *Stabilize highwalls by backfilling or rounding to 45 degrees or less, where feasible; reshape the land to near its original contour, and redistribute the topsoil and suitable overburden.*
12. *Properly prepare seedbed to a depth of six inches by pocking, ripping, discing, or harrowing. Leave the surface rough.*
13. *Reseed disturbed areas with adaptable species. (The Division recommends a mixture of species of grass, forb, and browse seed, and will provide a specific species list if requested.)*
14. *Plant the seed with a rangeland or farm drill, or broadcast the seed. Fall is the preferred time to seed.*

V. VARIANCE REQUEST (Rule R647-3-110)

Any variance request must be approved in writing by the Division

Any planned deviations from Rules R647-3-107, Operation Practices, R647-3-108, Hole Plugging Requirements, or R647-3-109, Reclamation Practices, as summarized above (see IV. Operation and Reclamation Practices Item # 1-14), should be identified below listing applicable rule number. Give justification for the variance(s) and alternate methods or measure to be utilized. Written approval from the Division will be given, if the proposed alternative methods to be used are consistent with the Act.

Are variances being requested? Yes ☐ No ☒

1st Variance Requested

Item # 10 Applicable Rule # stockpile Top soil
(i.e. R647-3-109.10 (if you did not want trenches & pits reclaimed))

Justification: All waste and disturbed areas are on existing waste piles without Topsoil

Alternate methods or measure to be utilized: plant on waste materials (see enclosed letter)

2nd Variance Requested

Item # _____ Applicable Rule # _____

Justification: _____

Alternate methods or measure to be utilized: _____

3rd Variance Requested

Item # _____ Applicable Rule # _____

Justification: _____

Alternate methods or measure to be utilized: _____

Attach additional page if more variances are requested.

VI. SURETY (Utah Code Ann. §40-8-7(1)(c))

A reclamation contract and surety must be provided to and approved by the Division prior to commencement of operations. All mining operations are required to furnish and maintain reclamation surety to guarantee that the land affected is reclaimed (Utah Code Ann. §40-8-7(1)(c)).

The reclamation surety amount is based on the nature, extent and duration of operations. The amounts are based on data from current large mine surety and are used as a general guide, along with actual site conditions. Reclamation surety for small mines is reviewed every three (3) or five (5) years and adjusted as necessary for inflation/deflation based upon acceptable Costs Index. **Contact the Division for the dollar amount required for a three (3) or five (5) year period for this project.**

I have provided or will provide surety in the form of:

- ☒ Certificate of Deposit ☐ Letter of Credit ☒ Surety Bond ☐ Cash (certified funds)
☐ Other _____ (please identify) _____ undecided

1/24/08

Sirs;

Concerning the request for variance, Item #10. The area within the five acres of disturbed land is at present mostly covered by Uranium waste from past mining. Waste from the mining operation being applied for will be placed on top of this existing waste area. As the end of mining nears, as much of the waste produced as possible will be back filled into mined out areas underground. There is no top soil available to cover the waste piles in this area. The topography of the immediate surrounding area is composed of the thick varied colored shales of the Brushy Basin formation, which is basically a sterile environment for vegetation. The BLM has reclaimed mine sites and waste dumps in the vicinity, none of which were covered by topsoil and from appearances were probably not seeded.

One acre of impacted land will be dedicated for an office trailer and a trailer to be used as a change room for miners. There will also be a septic tank and drain field on this site. This one acre site is covered by a layer of sand. Placement of the two trailers will have a minimal surface disturbance not requiring reclamation other than raking out tire marks at the end of mining. The sand dug up for the placement of the drain field will be put back on top of the drain field until the end of mining activities.

Ted Thompson
Mine Owner

VII. PERMIT FEE (Utah Code Ann. §40-8-7(1)(i))

A permittee's authorization under a notice of intention to conduct small mining operations shall require the paying of permit fees as authorized by the Utah Legislature (R647-3-102.5). Permit fees are assessed to new and existing small mining operations, and annually thereafter, until the project disturbances are successfully reclaimed by the Permittee / Operator and released by the Division.

Small Mine Notices require a \$150.00 fee, which must accompany this application, or the Division cannot process it.

VIII. SIGNATURE REQUIREMENT

(Please check the box if applicable and place your initials on the line provided)

TT ☒

I have enclosed the required permit fee.

TT ☒

I have enclosed/requested a Reclamation Contract (Form MR-RC) and the appropriate reclamation surety amount or have made arrangements as to when the surety will be furnished.

TT ☒

I understand that I am not authorized to create any surface disturbance until the surety amount is posted and approved in writing from the Division of Oil, Gas and Mining and any other authorized regulatory agency.

CERTIFICATION

I state under penalty of perjury under the laws of the state of Utah and the United States of America that:

- a. I have read this form and declare the information, statements and/or documentation are true, correct and complete to the best of my knowledge and belief; AND
- b. I commit to the reclamation of the aforementioned small mining project as required by the Utah Mined Land Reclamation Act (40-8) and the rules as specified by the Board of Oil, Gas and Mining.
- c. **This certification must be signed by:** (1.) an executive officer if the applicant is a corporation; (2.) a partner if applicant is a partnership (general or limited); (3.) the owner if applicant is a sole proprietorship; or (4.) the member or manager if applicant is a limited liability company.
